WEI HAN COMPANY

AnHui Weihan Trading Co., Ltd. is a professional manufacturer specializing in the production, processing and sales of silicone (rubber) products and accessories.

Providing a full line of silicone products in medical, cosmetics, household and sports. A perfect supply system and excellent service has enabled us to quickly grow. In the past 3 years, more than 90 companies have cooperated to develop new products. More than 900,000 products are exported to North America each year.

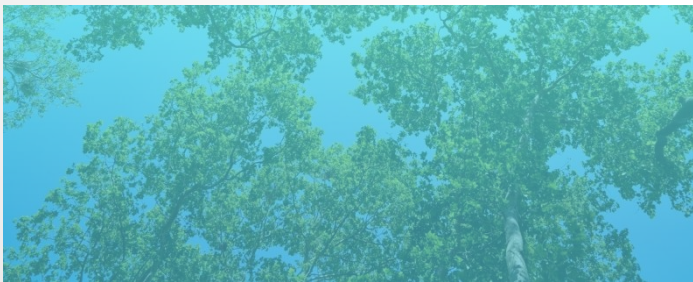

WHY CHOOSE SILICONE

Environmentally Friendly and BPA Free

From the extraction of raw materials, to the molding of products, to the final destruction, the silicone products will not produce toxic or harmful substances. Being BPA Free, it can be easily tested by FDA and LFGB.

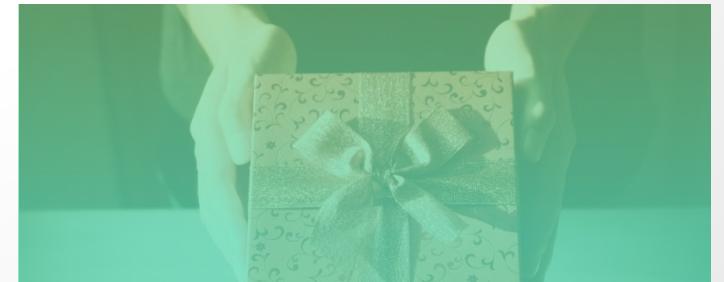

Stable and Durable

The performance of silicone material is very stable. It does not react with any substance except strong alkali and hydrofluoric acid. Therefore, silicone products generally have a long life and are very durable.

Superior Appearance

Silicone products can be customized in a variety of shapes and unique colors. The touch is soft and smooth, which makes it easy to get people's favor in appearance so it is widely used in household goods and gifts.

OUR PRODUCT QUALITY

Depending on the test standard.
We have four grades.

01

GENERAL SILICONE

General Silicone is mostly used in industrial parts, sports protection products, parts of daily goods and other miscellaneous items. This type of product main focus is on practicality and economy.

02

FDA

Most kitchen and cosmetics products belong to this level. Compared with general silicone products, FDA-grade quality items pay more attention to safety. The products are not harmful to the human body.

03

LFGB

An extra step from FDA-grade products, their materials are different, but the quality is not lost. For product testing, LFGB level adds some testing items such as peroxides and heavy metal.

04

LFGB PLATINUM

Platinum Silicone Gel has a huge quality and performance. The safety requirements are higher for this grade. Products in this tier are generally used in medical environments or for special requirements.

The background of the slide features a soft-focus image of a person's hands. One hand is holding a white tube of product, and the other is being treated with the product. A small, circular product cap is visible in the upper left. The entire image is overlaid with a semi-transparent teal and yellow gradient.

SILICONE FOR MAKE UP

Silicone makes easy to apply thin layers of skincare products, facial mask, peel, serum, and much more.

It's soft and hygienic, suitable for sensitive face and body skin, easy to clean with water, and very durable and safe to use professionally or at home.
